PROFILE

Full-stack developer skilled in **Next.js, TypeScript, Node.js, and AI integration**. Experienced in building responsive web applications and creating AI-powered features such as dynamic question generation, voice input, and intelligent feedback. Passionate about solving real-world problems with modern web technologies.

EDUCATION

Galgotias University, Greater Noida | June 2022 – May 2026
B.Tech — Computer Science & Engineering (AI & ML)
CGPA: **8.18 / 10**

PROFESSIONAL EXPERIENCE

Worked as a frontend intern, where I developed reusable UI components using React and Tailwind CSS, integrated Web3 APIs for wallet connection and blockchain interactions, and contributed to multiple production features. I collaborated with a team of developers to debug and enhance user interfaces, ensuring smooth functionality and a better user experience. This internship gave me practical exposure to modern frontend development and working in a collaborative remote environment.

PROJECTS

AI Mock Interview System

- Designed and developed an **AI-powered mock interview platform** to help students and professionals practice for job interviews.
- **Generated dynamic, role-specific interview questions** using **Google Generative AI** based on job role and skill set.
- Implemented **voice-to-text conversion** to allow users to answer questions verbally and get real-time transcription.
- Built an **AI-driven feedback system** that evaluates answers for **content quality, clarity, and confidence**, and provides actionable suggestions for improvement.
- Integrated **webcam support** to simulate realistic online interview scenarios.
- Developed a **user dashboard** to track previous sessions, review AI feedback, and monitor performance over time.
- Created a **secure authentication flow** using **Clerk** for user sign-up, login, and session management.
- Managed relational data with **PostgreSQL** and **Drizzle ORM** for scalable and structured storage.
- Deployed the platform on **Vercel**, ensuring high availability and smooth user experience.
- Helped users **reduce preparation time** and **gain confidence** through personalized, AI-powered interview simulations.

SKILLS

- **Frontend:** React, Next.js, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express
- **Databases:** PostgreSQL, MongoDB, SQL
- **Languages:** JavaScript, TypeScript, C++
- **AI & Cloud:** Google Generative AI, Speech-to-Text APIs
- **Tools & Platforms:** Git, GitHub, Vercel

ACHIEVEMENTS

- Ranked **Top 30 teams** in **NASA Space Apps Challenge (Delhi NCR)**.
- Solved **400+ DSA problems in C++**, demonstrating strong algorithmic and problem-solving skills.
- Active participant in **hackathons, GDG events, and developer meetups**
