Summary

Computer Science student and full-stack developer experienced in building scalable web applications and efficient system-level software. Created multiple reusable UI components and robust database solutions. Strong foundation in competitive programming with robust algorithmic skills and a solid coding challenge rating.

Education

Galgotias University

B.tech in Computer Science and Engineering (AI&ML)

June 2022 – May 2026

- CGPA: 8.18

Technical Skills

Languages: C++, C, JavaScript, TypeScript

Frontend: React, Next.js, Tailwind CSS, HTML5, CSS3

Backend & Databases: Node.js, Express, MongoDB, SQL, PostgreSQL

Tools & Platforms: Git, GitHub, Vercel

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, AI/ML

Experience

Frontend Blockchain Intern

EliteKods

Remote

March 2024 – May 2024

- Developed 30+ reusable UI components using React and Tailwind CSS across multiple features.
- Contributed to 10+ production projects by building core frontend features and layouts.
- Integrated 10+ Web3 APIs for wallet connection, smart contract data, and blockchain interactions.
- Collaborated with a 5-member team to debug and resolve 20+ UI/UX issues, improving frontend quality.

Projects

Mini Database Engine (C++17 Systems Programming Project) [Project Link](#)

August 2025

- Built an ACID-compliant database engine with LRU buffer pool and transaction support, achieving 35% faster data access compared to baseline implementation.
- Designed SQL parser and executor supporting CREATE, INSERT, and SELECT operations across 5 data types with 98% test case success rate.
- Resolved critical multi-table storage bug by implementing isolated file architecture, eliminating data corruption across concurrent operations.
- Engineered a comprehensive, cross-platform solution featuring a fully documented codebase, robust multi-table test suite, and a streamlined CMake build system supporting Windows, Linux, and macOS.

Full Stack Quiz Application [Project Link](#)

October 2024 – November 2024

- Created a scalable full-stack quiz application supporting 50+ concurrent users with JWT-based role authentication and dedicated admin dashboards.
- Designed and implemented real-time user-facing features including leaderboards, rankings, quiz progress tracking, and instant score updates.
- Engineered secure authentication workflows, managing user login, registration, and session persistence with Node.js, Express, MongoDB, and JWT.
- Created a fully responsive frontend with React and Tailwind CSS, ensuring seamless performance across desktop and mobile devices with smooth UI interactions.

Achievements

- Solved 400+ DSA problems in C++ with max LeetCode contest rating of 1780 and GeeksforGeeks rating of 1628.
- Ranked top 30 teams across Delhi NCR in NASA Space Apps Challenge and participated in 4+ hackathons.
- Maintains active Codeforces rating of 928 through ongoing competitive programming.
